Match Charting: General play

The chart below is used to gather general information about a player. The chart records the score, the serve, and how the rally finished:

- Fill in the score before every point

- For every point record the serve as either 1, 2, D, or A (1st serve, 2nd serve, double fault, or ace)

- At the end of every point note how the point finished by recording either winner (tick) or error (cross). Mark this in either the player column or opponent column – depending upon who hit the winner or error. (R) indicates a return of serve

- At the end of the match use the data collected to calculate:

  - 1st serve %
  - No. of winners hit
  - No. of errors hit
  - % 1st serve points won
  - %2nd serve points won

Player: _____ **Opponent:** _____

Date: _____ **Venue:** _____ **Event:** _____ **Round:** _____

Score	Player						Opponent					
	serve	f/h	b/h	volley	smash	drop	serve	f/h	b/h	volley	smash	drop
